# ELIAC '24

## CIBERSEGURIDAD
### EN LA ERA DE LA IA

Un evento **isecurity**

## Why ELIAC?

The Latin American Meeting on Applied Artificial Intelligence in Cybersecurity (ELIAC) presents itself as a platform for discussion and knowledge exchange on the latest advances in artificial intelligence applied to cybersecurity.

Within the framework of ELIAC, prominent opinion leaders in artificial intelligence and cybersecurity will gather. This meeting will provide a space for the exchange of knowledge, experiences, and visions on the state-of-the-art of AI applied to cybersecurity.

ELIAC will address the risks, challenges, and advancements in this field, exploring how the processes and strategies of cyberattacks are evolving from both the attacker and defender perspectives.

## Latin American Focus

ELIAC stands out for its Latin American focus, strengthening cooperation between countries in the region and enriching the debate with diverse perspectives and experiences. This year, experts and professionals from Peru, Bolivia, Colombia, Ecuador, and Chile are expected to gather, and the event will be streamed live with simultaneous translation to ensure international participation without language barriers.

## Exploring the Revolution in Cybersecurity

ELIAC 2024 offers an opportunity to learn firsthand how artificial intelligence is revolutionizing cybersecurity. Attendees will explore key topics such as current risks and challenges, defense and attack strategies, and the latest technological advancements in the field. Through presentations and panel discussions, a comprehensive view of how AI is transforming the cybersecurity landscape will be provided.

## Contribution to the Cybersecurity Sector

The event will feature prominent panelists and speakers from various industries and sectors. The participation of experts and leaders from key organizations in ELIAC 2024 offers an enriching and educational experience for all attendees. The diversity of perspectives and knowledge shared at this meeting will contribute to the development of more effective and advanced strategies in the fight against threats.

## In Conclusion

ELIAC 2024 is not just an event; it is a point of convergence for innovation, collaboration, and advancement in cybersecurity. It aims to position itself as a reference in the discussion for developing AI-based solutions to address cybersecurity challenges. In this second edition, we expect to have 300 participants, bringing together IT Executives, CISOs, and cybersecurity managers from sensitive industries such as Finance, Critical Infrastructure, Health, Retail, Production, among others, gathering at least 180 companies.
